

## **STAGING**

Staging must be provided and set up at least one hour prior to band's arrival for load in. Stage dimensions: 24 feet of frontage with two 4 x 8 PA wings on each side for a total width of 40 feet. 12 feet deep with a 4 x 8 drum extension in the rear. Stage must be a minimum of 3 feet high. If stage is lower than 3 feet, a safety barricade must be supplied across the front of the stage. Stage must be situated 10 feet off the rear wall and no obstructions (basketball goals) overhead. A black drape/skirt will need to be affixed to the front of the stage. A diagram of the staging requirements can be found on the Reach and Teach website.

## **LODGING & HOSPITALITY**

Six double hotel rooms are required checking in the night before the concert date. Private dressing room, bathroom, and backstage area with food, drinks, water, and coffee & creamer, required on concert day.

## **ELECTRICITY**

Must have 220-amp service within 60 feet of the stage. Band will need to connect directly into the power panel. If power access is beyond 60 feet, a feeder line will need to be brought to the stage.

## **PARKING & SETUP**

Parking is required for four cars, equipment truck and 40 ft tour bus with 240V 50AMP hookup (shore power) if possible. Vehicles should be accessible at all times. Setup will take place on the morning of the concert date. Access to the performance space and electricity is necessary. Truck (24ft long by 13ft high) needs to be within 10ft of entrance to the performance space. Truck must be able to be unloaded onto a smooth hard surface. NO STAIRS. Eight students should be available to assist.

## **INTERNET ACCESS**

Reliable internet access is required for streaming live video, text message giveaways and various photo filter capabilities.

## **PERFORMANCE**

Show must take place in space with standing room only and must be blacked out. All overhead lighting should be turned off and external windows covered. Event involves the use of a fog machine, which will occasionally set off the smoke alarm. Most local fire departments will supply a fireman to monitor the event personally, allowing the sensors to be disarmed during the event. Note: Glow sticks and beach balls are not permitted.
